Barbara can help support anyone affected by cancer. This includes when you have cancer and when you care for someone with cancer. You can be a family member or friend, or you might be a professional carer.

Barbara can discuss your options together and guide you towards the support you need. Depending on what you need and want, she can offer advice, share information, and make referrals to the right services. Barbara can provide support over the phone, face to face in the local community or online via video calls.
